

# Silhouette *lift*®

*To have a firmer, smoother and younger face... you don't need a full face lift*

*Silhouette Lift sutures  
An authentic alternative  
to the face lift*

SILHOUETTE SUTURES \* FACE REJUVENATION \* NEW TECHNIQUES

# *SUITABLE CANDIDATES FOR THE NEW "SILHOUETTE SUTURES"*

**WOMEN AND MEN WHO WANT TO ELIMINATE SAGGING SKIN WITHOUT  
NEEDING A FULL LIFT**

**YOUNG PEOPLE WHO JUST WANT TO CORRECT THE RELAXATION OF  
THEIR FACE**

**ANYONE WHO WANTS TO ACHIEVE THE RETURN OF A DEFINED LINE IN  
THE JAW AREA**

**PATIENTS WHO HAVE HAD A LIFT IN THE PAST AND WHO NOW WOULD  
LIKE TO REFRESH THE LIFT WITH A SMALL "PULL"**

**PEOPLE WHO WOULD LIKE TO REGAIN THE VOLUME IN THEIR  
CHEEBONES WITHOUT IMPLANTS**

**ANY PERSON WHO HAS NOTICEABLE WRINKLES AROUND THE MOUTH  
AND WOULD LIKE JUST TO ATTENUATE THEM BUT NOT TO FILL THEM UP**

**ANYONE WHO WOULD LIKE TO HAVE A NATURAL REJUVENATION,  
WITHOUT ALTERING THEIR EXPRESSION**

**PATIENTS WHO WISH TO IMPROVE THEIR FACE, BUT DO NOT HAVE TIME  
FOR A LONG AFTER CARE PERIOD**

**PATIENTS WHO WISH TO SEE IMMEDIATE RESULTS**

---

## *WHAT DO THE NEW SILHOUETTE SUTURES ACHIEVE?*

The origin of these sutures is in Reconstructive Surgery, they have been used for years in clinical medicine to correct the effects of facial paralysis. The results that have been achieved and the development of the technique are very well known to reconstructive plastic surgeons.

Now this technique has arrived in the area of Aesthetic Surgery where its multiple advantages of immediate and natural results, along with a short recovery time has led plastic surgeons to use the sutures in cosmetic surgery.

Silhouette Lift sutures are made of polypropylene, a totally biocompatible material, used for a long time in Cardiovascular and Ophthalmic Surgery. These sutures contain microcones that, anchoring in the soft tissues, provide an internal effect of traction that produces a natural looking face lift.

This lift in the face recovers the volume and the firmness of youth.

Silhouette Lift suture surgery is performed on an outpatient basis, under local anesthetic and leaving minimal scar, which is hidden above the hairline.

After an initial inflammation period, which disappears after about three days, the patient can return to normal life.

# *Advantages of the New Silhouette Lift sutures*

**YOU RECOVER IN A RECORD TIME**

**DAY SURGERY, CLINICAL ADMISSION IS NOT NECESSARY**

**IMMEDIATE RESULT**

**RETURN HOME ON THE DAY OF THE PROCEDURE AND REJOIN YOUR SOCIAL LIFE IN THREE DAYS**

**EFFECTIVE, NATURAL AND LONG LASTING RESULTS**

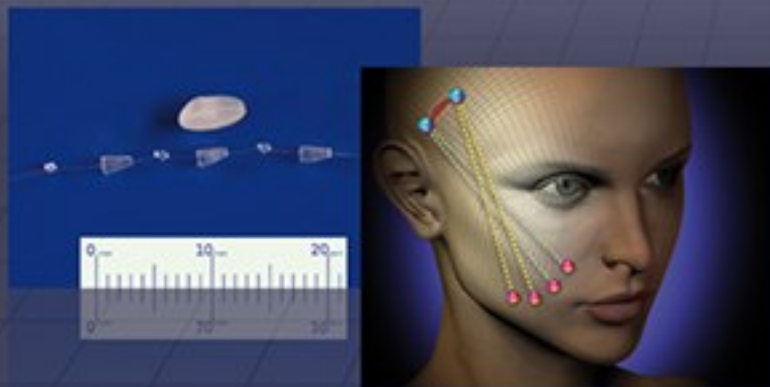

**SILHOUETTE SUTURES RETURNS YOUR OVAL FACE SHAPE AND MAKES YOU YOUNGER**

**YOUR FACE RECOVERS ITS LOST FIRMNESS**

**YOUR JAW LINE HAS THOSE DEFINED CONTOURS BACK**

**YOUR CHEEKBONES RISE**

**YOUR FACE RECOVERS THE VOLUMES OF YOUTH**

*The result:  
a fresher,  
younger,  
more rested expression...*

*...without losing its natural look!*

THE ADVANTAGES OF SILHOUETTE LIFT SUTURES ARE:  
IN ONLY THREE DAYS YOU ARE COMPLETELY RECOVERED AND  
CAN REJOIN YOUR SOCIAL LIFE.  
AS THE TREATMENT IS DONE ON AN OUTPATIENT BASIS, THE  
COSTS ARE LOWER.  
YOU CAN GO OUT IN THE SUN AFTER ONE WEEK.  
THE RESULTS LAST SEVERAL YEARS.

SILHOUETTE SUTURES ARE MADE OF POLYPROPYLENE, A BIOCOM-  
PATIBLE MATERIAL, USED IN CARDIOVASCULAR AND  
OPHTHALMIC SURGERY.  
THESE SUTURES HAVE BEEN CERTIFIED BY THE U.S. **FDA** AND  
HAVE THE EUROPEAN UNION **CE** MARK.
